ENGINEERING
& TECHNOLOGY ENROLLMENTS FALL 1989

PART I
ENGINEERING

Engineering Enrollments By School And By Curriculum,
For All Students Including A Breakdown By Women,
Minorities And Foreign Nationals.

ENGINEERING MANPOWER
COMMISSION
OF THE
AMERICAN ASSOCIATION
OF
ENGINEERING SOCIETIES, INC.

Commissioners of the Engineering Manpower Commission, February 15, 1990

Mr. Peter S. Adams, Consultant,
E. I. duPont de Nemours & Co.

Dr. Eleanor Baum, Dean, School of Engineering,
Cooper Union

• Dr. Fred Beaufait, Dean, College of Engineering,
Wayne State University

Dr. Theodore A. Bickart, Dean of Engineering,
Michigan State University

• Dr. William R. Boyle, Vice President/Division Chairman,
Oak Ridge Associated Universities

• Mr. Donald C. Brown, Consultant
(Retired, Sun Company/Oryx)

• Mr. Charles Day, Director, Educational Services,
American Society of Civil Engineers

• Mr. Edward J. Doyle, Consultant
(Retired, New Jersey Bell)

Mr. Earl E. Gottsman, Vice President for Academic Affairs,
Capitol College

• Mr. Dwight Gourneau, Senior Engineer,
IBM Corporation

• Mr. Lewis G. Grimm, Associate Vice President,
Frederic R. Harris Inc.

Mr. John Hannabach, Director, Corporate Relations/Placement,
Georgia Institute of Technology

• Dr. Edward T. Kirkpatrick, President,
Wentworth Institute of Technology

• Dr. Charles S. Lessard, Associate Professor, Bioengineering,
Texas A&M University

Miss Barbara A. Montague, Consultant,
E. I. duPont de Nemours & Co.

Mr. Luke H. Noggle, Manager, Graduate Placement & Training,
Westinghouse Electric Corporation

Mr. Robert L. Ohrtman, Director of Engineering Administration,
Grumman Aerospace Corporation

Dr. David R. Reyes-Guerra, Executive Director,
Accreditation Board for Engineering & Technology

• Mr. Michael B. Rubin, Mechanical Engineer,
David Taylor Research Center, U.S. Navy

Mr. Robert Rusek, Division Manager, Compensation,
AT&T/Corporate

Dr. William M. Sangster, Dean, College of Engineering,
Georgia Institute of Technology

Mr. Donald G. Schroeter, Consultant
(Retired, Amoco Corporation)

• Mr. Glen J. Snyder, Consultant,
SM/MS Inc.

• Mr. James Donald Strong, Consultant
(Retired, U.S. Army/NSPE)

Mr. Neal C. Thompson, Senior Staff Compensation Specialist,
Exxon Research & Engineering

Dr. Glen Vanden Berg, Agricultural Project Coordinator,
Beltsville Agricultural Research Center, USDA

Dr. M. Lucius Walker, Jr., Dean of Engineering,
Howard University

Mr. Paul B. Wood, Assistant Program Director/Design,
Port Authority of New York & New Jersey

• Ms. Mary Ann Zimmerman, Consultant,
TransCentury Corporation

• Representative or Alternate Representative
for an AAES Member Society

ENGINEERING AND TECHNOLOGY ENROLLMENTS FALL 1989

PART I
ENGINEERING

Enrollments by School and Curriculum for All Students,
Including Breakdowns for Women, Minorities, and Foreign Nationals

A Report of an Annual Survey
Conducted by the

ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

415 Second Street, N.E.
Washington, D.C. 20002

© 1990 by the American Association of Engineering Societies, Inc. As it is the objective of AAES publications to be a forum for the free expression and interchange of ideas, the opinions, positions, and research stated in published works are those of the original researchers and authors and not by the fact of publication necessarily those of the American Association of Engineering Societies, Inc., or related bodies. Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations that may have influenced positions taken or advocated in these materials.

IBSN # 0-87615-192-6

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering--over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms*.

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

1990 Officers

Lawrence P. Grayson, Chairman, Board of Governors
Albert Grant, Chairman-Elect
George Kotnick, Past Chairman
Walter B. Loewenstein, Secretary/Treasurer
Michell H. Bradley, Executive Director

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data on questions relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin*, which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1990 Officers

Donald C. Brown, Chairman
Dr. William M. Sangster, Vice Chairman
Luke H. Noggle, Vice Chairman
Dr. Fred Beaufait, Chairman, Education Committee
Dr. Edward T. Kirkpatrick, Chairman, Educational Relations Committee
Dr. Glen Vanden Berg, Chairman, Enrollments Committee

AAES Staff

R. A. Ellis, Director, Manpower Studies
Gordon Davis, Director of Publications

The Engineering Manpower Commission wishes to express its grateful appreciation for the cooperation of the hundreds of organizations that provided the data on which this report is based.

INTRODUCTION TO VOLUME I

This is the 22nd annual report from the Engineering Manpower Commission (EMC) on enrollments in engineering and engineering technology in the United States. Volume I of the study covers engineering; Volume II covers engineering technology. All data are for enrollment as of Fall, 1989.

Volume I provides detailed data on enrollment in engineering programs for all students and for women, African Americans, Hispanics, Asian Americans, American Indians, and foreign nationals. Enrollment is tabulated by the year in school—first year, second year, etc.—for full-time undergraduates, and by the type of degree sought—master's and professional engineering, or doctorate—for full-time graduate students. Part-time students are tabulated separately at the undergraduate and graduate levels, irrespective of their year in school or of the type of advanced degree they are seeking. Note that schools showing no data for particular full-time students may still have such students attending part-time. Two basic types of tabulations are provided, in addition to summary tables. The first summarizes overall enrollment, across all curricula, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering programs.

The second general type of tabulation provides detailed enrollment data for each engineering program offered by these schools. Programs are listed within some twenty broad engineering disciplines (e.g., chemical, civil, etc.); disciplinary subtotals are provided both within these listings and in separate summary tables. Within each broad discipline, programs are listed alphabetically by their detailed titles, within schools and states, thus preserving such distinctions as the differences between programs in general civil engineering, surveying engineering, and transportation engineering. Using these tables, readers can obtain information on enrollment in specialized fields of engineering that are not isolated in the broader disciplinary groups, such as manufacturing engineering.

Like all of EMC's surveys of engineering enrollments and degrees since 1986, all tabulations in this report draw on a master data base on engineering programs, in order to provide accurate, consistent descriptive data. EMC's educational surveys also use the data base to generate the survey forms used to obtain these statistics. Participating institutions receive laser-generated questionnaires that include the specific programs and other descriptive data applicable to a particular engineering school. This simplifies data entry for all parties and improves the consistency and accuracy of the work.

Once again, institutions have been added to the study, to keep it as comprehensive as possible. This report covers 323 schools with engineering programs; in addition, at least two additional institutions are known to be operating but could not participate in this year's survey: the University of California at Santa Cruz (the California earthquake may have had something to do with this), and the the new College of Polymer Science and Polymer Engineering at the University of Akron. Engineering enrollments are reported here for the first time for the University of California at Riverside, the University of Maryland at Baltimore, the Oregon Graduate Center, Messiah College in Pennsylvania, and Baylor University in Texas. Milliken University in Illinois no longer has engineering programs and has been dropped from coverage in these surveys. Also, listings for Alfred University and the SUNY College of Ceramics have been combined. There were a number of other name changes, all at the request of the participating institutions.

Major efforts are made in these studies to obtain full cooperation from participating schools. In addition, when partial responses are possible—for example, some schools cannot report the numbers of women who are enrolled in each specific combination of engineering program and year in school, but can report how many women are enrolled in each program, overall—then the overall data are pro-rated to generate reasonable approximations for data entry. As a result of these steps, the incidence of missing information in EMC's educational surveys has been greatly reduced. Consequently, these studies no longer use the estimates of missing data that appeared in our reports on enrollments and degrees before 1986. In addition, detailed codes are employed to report the precise adjustments used to deal with every response (see the description of the "T-A-R" codes, below).

Detailed commentary on the results of the survey of Fall, 1989 engineering enrollments will be issued simultaneously with these reports in issue No. 100 of EMC's *Engineering Manpower Bulletin*. We will take note of the following outcomes, however. Overall full-time undergraduate enrollments continued the steady decline that has been observed for the last several years, by 2.2 percent compared to 1988. As expected, freshman enrollment also declined, after experiencing a temporary improvement the previous year. Women held their share of all first-year engineering enrollments, and the absolute as well as the relative numbers of freshman minority students increased, as has been the case in other recent years.

The Engineering Manpower Commission has been reviewing the contents and format of its education surveys for the last several years. Extensive changes in the packaging of these enrollment surveys are anticipated. One major change already in place is the provision of these data in machine-readable form; for further information and ordering information, see the inside back cover of this report.

Any questions regarding the course content or other details of specific engineering programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies.

COVERAGE AND RESPONSE

In engineering, the 1989 enrollment study covers 323 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these programs are newly initiated and have not been included in previous reports from EMC. These listings provide a comprehensive enumeration of enrollment in engineering programs available in the United States today. In counting institutions, EMC abides by local preferences in deciding whether or not to count a school's

TEN YEAR SUMMARY OF FALL ENGINEERING ENROLLMENTS, 1980-1989:

	1980	1981	1982	1983	1984	1985	1986	1987	1988	1989
FULL TIME UNDERGRADUATES:										
First Year	110,149	115,280	115,303	109,638	105,249	103,225	99,238	95,453	98,009	95,420
Second Year	84,982	87,519	89,785	89,515	83,946	79,627	76,195	73,317	71,030	71,267
Third Year	80,024	86,633	90,541	91,233	89,509	84,875	80,386	77,085	73,761	70,483
Fourth Year	84,442	92,414	102,055	109,036	109,695	110,305	107,773	104,003	97,614	94,465
Fifth Year	5,520	5,731	5,706	6,722	6,236	6,159	5,928	7,140	5,755	6,894
Total	365,117	387,577	403,390	406,144	394,635	384,191	369,520	356,998	346,169	338,529
PART TIME UNDERGRADUATES:										
Total	32,227	32,825	31,940	35,061	34,864	36,673	38,137	35,200	39,243	39,748
FULL TIME GRADUATE STUDENTS:										
M.S./P.E.	29,870	32,310	33,968	38,826	37,718	39,147	43,106	43,219	41,633	40,190
Doctorate	14,465	15,472	16,442	18,540	19,559	21,494	24,227	26,124	27,593	28,777
Total	44,335	47,782	50,410	57,366	57,277	60,641	67,333	69,343	69,226	68,967
PART TIME GRADUATE STUDENTS:										
Total	28,250	29,818	31,589	33,674	35,888	34,864	39,863	41,435	42,781	45,081
NUMBER OF SCHOOLS:										
Total	287	286	286	292	289	297	311	316	320	323
With ABET-approved programs	246	250	249	258	258	264	270	277	281	284

branches as separate entities. Thus all of the various locations of the Pennsylvania State University are counted as a single institution, while in other cases (for example, Purdue and the University of Texas), some branches are treated as separate schools. This treatment is a continuation of EMC's traditional practices.

As in the past, data for some institutions were obtained by substituting an earlier response for missing reports. Substitutions are permitted because problems caused principally by personnel turnover make it unreasonable to expect complete participation every year by every school. In a change from previous EMC practice that was first adopted in 1987, we are now using responses for any previous year rather than drop a school from coverage. The older substitutions are used only when extended efforts have failed to yield a current response; schools handled in this fashion for the 1989 survey are identified below in the detailed explanation of response codes. In a number of cases, the substituted data applies only to a portion of an institution's response; for example, undergraduate data may have been covered with a fresh 1988 response, while graduate programs were handled with older data. All substitutions are identified in the body of the report by appropriate "T-A-R" codes (see below). The use of substitutions has been substantially reduced by efforts to work for a comprehensive response to each of these surveys.

ERROR CHECKING

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of enrollment level and school were checked against original questionnaires. Results for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. Instances of both sorts of problems were found and fixed; in some cases, reporting errors on the part of participating institutions were identified, while in others some significant shifts in patterns of engineering enrollment were confirmed.

Program-level ABET accreditation codes were updated for this study. Note that EMC's program-level accreditation codes reflect only ABET certifications, and do not allow for program-level approvals from the new accreditation board for computer and information science.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools, but excluding the federal service academies.

"F" denotes the federally-sponsored schools.

"N" means non-sectarian, non-profit private institutions.

"R" denotes religiously affiliated private institutions.

"P" denotes proprietary schools.

A: Accreditation:

"E" means at least one engineering program is accredited by ABET.

"T" means that at least one technology program is accredited by ABET.

"B" means that the school has ABET-approved courses in both engineering and technology.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by regional accreditation agencies like the Southern Association of Colleges and Schools.

"X" means none of the preceding codes apply.

R: Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in the survey of 1988 enrollment. Codes are listed here in alphabetical order; two codes were defined but not used.

"A" means all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for the specific population groups. The numbers for all enrolled students are not affected.

"B" is similar to "A," except that details were provided for women only; details for minorities and for foreign nationals were not provided.

"C" is similar to "A," except that details were provided for women and minorities only; details for foreign nationals were not provided.

"D" is similar to "A," except that details were provided for minority groups and foreign nationals only; details for women were not provided (NOT USED).

"E" is similar to "A," except that details were provided for women and foreign nationals; details for the minority groups were missing (NOT USED).

"F" is similar to "E," except that details were provided for some, but not all, of the minority groups; that is, some minority data were missing.

"G" means that part-time enrollment was not separated out from full-time enrollment.

"H" is similar to "G": part-time enrollment was not separated out from full-time enrollment, and in addition, some details were missing.

"P" means that some data were developed by EMC, by pro-rating accurate aggregates (such as information on all female enrollment) among the various programs at a school.

"Q" means that some data were prorated by EMC, and in addition other data were missing altogether.

"8" denotes a substituted response using data originally submitted for Fall, 1988. Ten engineering schools were treated with such data.

"7" denotes a substituted response using data originally submitted for Fall, 1987. This code was utilized only for engineering technology schools in the survey of 1989 enrollment.

"5" denotes a substituted response using data originally submitted for Fall, 1985. One engineering school was treated this way: the University of Hartford in Connecticut.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR7: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1987 response. "TAR" code of NEB: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for minorities and foreign nationals.

Program-Level Accreditation Codes:

These are used only in the tabulations for specific curricula:

"B" denotes ABET accreditation for the program at the bachelor's level.

"M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent).

"A" denotes ABET accreditation at the associate degree level.

"N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when an ABET-approved BS curriculum in mechanical engineering is offered. If an undergraduate program in engineering mechanics as such existed, then a "B" code would have been used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

Engineering Discipline Category Abbreviations:

AER = Aerospace and Related
AGR = Agricultural
ARC = Architectural
BIO = Bioengineering
CER = Ceramics
CHE = Chemical
CVL = Civil and Construction
CMP = Computer
ELC = Electrical and Electronic
ENS = Engineering Science
ENV = Environmental
GNL = General Engineering
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials and Metallurgical
MEC = Mechanical
MGN = Mining/Mineral/Geological
NUC = Nuclear
PET = Petroleum and Natural Gas
SYS = Systems
OTH = Others
PRE = Undeclared majors, or other "freshman engineering" students

MISCELLANEOUS NOTES

First-year enrollments are incompletely covered in these surveys, for a variety of reasons, including the fact that at many schools freshmen cannot declare a major field. The under-enumeration is consistent from one year to the next, so EMC's freshman time series data are reliable as an indicator of trends, even though they fall considerably short of a total enumeration.

In 1987, EMC stopped covering enrollment in pre-engineering or other two-year transfer programs in community or junior colleges; it also dropped coverage of "3-2" transfer programs in four-year colleges that not do have their own engineering degrees.

Women counted by EMC include minorities or foreign nationals. Counts of ethnic minorities are limited to U.S. citizens or other permanent residents. "Foreign Nationals" are students in the United States on F-1 (student) or J-1 (exchange) visas, and exclude immigrants or other permanent residents.

CURRENT AND FORTHCOMING ENGINEERING MANPOWER COMMISSION PUBLICATIONS

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1990 (to be distributed in July 1990)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1990 (to be distributed in July 1990)

An abridged version of the Special Industry Report. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1990 (to be distributed in July 1990)

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1989

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the nation. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

NEW! Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING AND TECHNOLOGY DEGREES, 1989

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

NEW! Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $14.00

TO ORDER:

Machine-readable products are provided on IBM-standard 5 1/4" floppy disks and include most, not but all, of the details available in EMC's printed reports; for more information on these diskette products, contact the AAES Manpower Studies Department.

Member prices are available to members of AAES member societies, employees of Industry Affiliates, and educational institutions or firms that have participated in the study to be purchased. Please include society affiliation and membership number, Industry Affiliate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Institutional purchase orders are accepted, as are Visa and MasterCard charges (include account number, expiration date and signature). Orders charged to Visa and MasterCard accounts may be placed directly by phone (U.S. only) at 1-800-658-8897. Mail orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.

Commissioners of the Engineering Manpower Commission, February 15, 1990

Mr. Peter S. Adams, Consultant,
E. I. duPont de Nemours & Co.

Dr. Eleanor Baum, Dean, School of Engineering,
Cooper Union

* Dr. Fred Beaufait, Dean, College of Engineering,
Wayne State University

Dr. Theodore A. Bickart, Dean of Engineering,
Michigan State University

* Dr. William R. Boyle, Vice President/Division Chairman,
Oak Ridge Associated Universities

* Mr. Donald C. Brown, Consultant
(Retired, Sun Company/Oryx)

* Mr. Charles Day, Director, Educational Services,
American Society of Civil Engineers

* Mr. Edward J. Doyle, Consultant
(Retired, New Jersey Bell)

Mr. Earl E. Gottsman, Vice President for Academic Affairs,
Capitol College

* Mr. Dwight Gourneau, Senior Engineer,
IBM Corporation

* Mr. Lewis G. Grimm, Associate Vice President,
Frederic R. Harris Inc.

Mr. John Hannabach, Director, Corporate Relations/Placement,
Georgia Institute of Technology

* Dr. Edward T. Kirkpatrick, President,
Wentworth Institute of Technology

* Dr. Charles S. Lessard, Associate Professor, Bioengineering,
Texas A&M University

Miss Barbara A. Montague, Consultant,
E. I. duPont de Nemours & Co.

Mr. Luke H. Noggle, Manager, Graduate Placement & Training,
Westinghouse Electric Corporation

Mr. Robert L. Ohrtman, Director of Engineering Administration,
Grumman Aerospace Corporation

Dr. David R. Reyes-Guerra, Executive Director,
Accreditation Board for Engineering & Technology

* Mr. Michael B. Rubin, Mechanical Engineer,
David Taylor Research Center, U.S. Navy

Mr. Robert Rusek, Division Manager, Compensation,
AT&T/Corporate

Dr. William M. Sangster, Dean, College of Engineering,
Georgia Institute of Technology

Mr. Donald G. Schroeter, Consultant
(Retired, Amoco Corporation)

* Mr. Glen J. Snyder, Consultant,
SM/MS Inc.

* Mr. James Donald Strong, Consultant
(Retired, U.S. Army/NSPE)

Mr. Neal C. Thompson, Senior Staff Compensation Specialist,
Exxon Research & Engineering

Dr. Glen Vanden Berg, Agricultural Project Coordinator,
Beltsville Agricultural Research Center, USDA

Dr. M. Lucius Walker, Jr., Dean of Engineering,
Howard University

Mr. Paul B. Wood, Assistant Program Director/Design,

Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations that may have influenced positions taken or advocated in these materials.

IBSN # 0-87615-185-3

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering--over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

1990 Officers

Lawrence P. Grayson, Chairman, Board of Governors
Albert Grant, Chairman-Elect

Walter B. Loewenstein, Secretary/Treasurer
Michell H. Bradley, Executive Director

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data on questions relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin*, which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1990 Officers

Donald C. Brown, Chairman
Dr. William M. Sangster, Vice Chairman
Luke H. Noggle, Vice Chairman
Dr. Fred Beaufait, Chairman, Education Committee
Dr. Edward T. Kirkpatrick, Chairman, Educational Relations Committee
Dr. Glen Vanden Berg, Chairman, Enrollments Committee

AAES Staff

R. A. Ellis, Director, Manpower Studies
Gordon Davis, Director of Publications

The Engineering Manpower Commission wishes to express its grateful appreciation for the cooperation of the hundreds of organizations that provided the data on which this report is based.

TABLE OF CONTENTS

Introduction i

- Hispanics 125
- Asian Americans 149
- American Indians 173

Combined Summaries 197

INTRODUCTION TO VOLUME II

This is the 22nd annual report from the Engineering Manpower Commission (EMC) on enrollments in engineering and engineering technology in the United States. Volume I of the study covers engineering; Volume II covers engineering technology. All data are for enrollment as of Fall, 1989.

Volume II provides detailed data on enrollment in engineering technology programs for all students and for women, African Americans, Hispanics, Asian Americans, and American Indians. (A sixth group, foreign nationals, is also tracked in EMC's surveys of engineering enrollments, but is not treated in reports on engineering technology.) Enrollment is tabulated by the year in school—first year, second year, etc.—for all full-time students; in addition, the tables include data on the enrollment of post-baccalaureate students. Part-time students are tabulated separately, irrespective of their year in school.

As in the 1988 enrollment survey, EMC has returned to an older format for the presentation of these data, combining information for both associate and bachelor-level programs in the same tabulations. Virtually no data have been suppressed (we no longer distinguish between third and fourth-or-later year enrollments in associate programs). This supports more efficient packaging of the data and facilitates the identification of schools that offer both types of programs. Such institutions do not adhere to a uniform set of conventions in classifying their students; some prefer to treat all first and second year students as associate degree candidates, and all third-or-higher year students as bachelor degree candidates. In such cases no first or second year enrollments are reported for the bachelor's programs. Other schools report first and second year enrollments for both types of programs.

Two basic types of tabulations are provided, in addition to summary tables. The first summarizes overall enrollment, across all curricula, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering technology programs.

The second general type of tabulation provides detailed enrollment data for each technology program offered by these schools. Programs are listed within some twenty broad engineering disciplines (e.g., chemical, civil, etc.); disciplinary subtotals are provided both within these listings and in separate summary tables. Within each broad discipline, programs are listed alphabetically by their detailed titles, within schools and states, thus preserving such distinctions as the differences between programs in civil engineering technology and surveying engineering technology.

Like all of EMC's surveys of engineering enrollments and degrees since 1986, all tabulations in this report draw on a master data base on engineering programs, in order to provide accurate, consistent descriptive data. EMC's educational surveys also use the data base to generate the survey forms used to obtain these statistics. Participating institutions receive laser-generated questionnaires that include the specific programs and other descriptive data applicable to a particular engineering school. This simplifies data entry for all parties and improves the consistency and accuracy of the work.

Two years ago, EMC decided to stop tracking enrollments in pre-engineering transfer programs offered by junior and community colleges, as well as enrollment in similar "3-2" transfer programs offered by four-year institutions without their own engineering departments. These programs are important sources of engineering students, but EMC's annual studies covered only a fraction of this type of enrollment. To provide a more comprehensive count of the total number of pre-engineering students outside traditional four-year engineering schools, the Commission would need to expand its surveys to cover hundreds of added institutions. EMC does not wish to burden its existing survey participants by asking them to provide information that cannot be used to build authoritative statistics, so we dropped coverage of these "feeder" pre-engineering programs entirely. This change reduced the associate-level enrollments counted in these surveys after 1986 by about 2,700 students.

Another important shift in 1987 was the decision to cover *all* schools with one or more programs approved by the Accreditation Board for Engineering and Technology (ABET). This provides improved consistency for time series data. EMC has never attempted to provide comprehensive coverage of all engineering technology programs, because unaccredited courses are offered at hundreds of community and junior colleges not ordinarily covered in the Commission's surveys, and there are inconsistencies from one school to the next (and even from one year to the next within particular schools) in judging just what should or should not be reported as an engineering technology program (indeed, EMC's own criteria have changed over the years). These kinds of inconsistencies have undercut time series comparisons, which are a major objective of these surveys. Strict coverage of the institutions with ABET-approved programs will help to improve this situation. The Commission continues to solicit additional responses from schools without ABET-approved technology programs, but we do not claim to provide comprehensive treatment of them.

Major efforts are made in these studies to obtain full cooperation from the participating institutions. In the case of schools with ABET-approved programs, a response for a previous year will be substituted if no current data has been provided, rather than drop the school altogether. In addition, when partial responses are provided—for example, some schools cannot report the numbers of women who are enrolled in every specific combination of programs and years in school, but can report how many women are enrolled in each program, overall—then the overall data are pro-rated to generate reasonable approximations for data entry. In addition, detailed codes are employed to report the precise adjustments used to deal with every response (see comments on "T-A-R" codes, below).

Detailed commentary on the results of the survey of Fall, 1989 engineering and engineering technology enrollments will be issued simultaneously with these reports in issue No. 100 of EMC's *Engineering Manpower Bulletin*. The Engineering Manpower Commission has been reviewing the contents and format of its education surveys for the last several years, and extensive changes in the packaging of these enrollment surveys are

FALL ENROLLMENTS IN ENGINEERING TECHNOLOGY, 1981-1989:

anticipated. One major change already in place is the provision of these data in machine-readable form; for further information and ordering information, see the inside back cover.

Any questions regarding the course content or other details of specific engineering programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies.

COVERAGE AND QUALITY CONTROLS

In engineering technology, the 1989 enrollment study covers 286 institutions, including all of those with curricula approved by ABET. The 1988 survey included coverage of 24 more schools; the difference can be traced to a lack of information in 1989 for a large number of Florida community colleges without ABET-approved programs. In other recent years, EMC has obtained reports for all of these schools directly from the staff of the Florida Department of Higher Education in Tallahassee, but this could not be done for the

1989 survey. In counting institutions, EMC abides by local preferences in deciding whether or not to count a school's branches as separate entities. Thus all of the various locations of the Pennsylvania State University are counted as a single institution, while in other cases branches may be treated as separate schools.

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of enrollment level and school were checked against original questionnaires. Results for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools, but excluding the federal service academies.

"F" denotes the federally-sponsored schools.

"N" means non-sectarian, non-profit private institutions.

"R" denotes religiously affiliated private institutions.

"P" denotes proprietary schools.

A: Accreditation:

"E" means at least one engineering program is accredited by ABET.

"T" means that at least one technology program is accredited by ABET.

"B" means that the school has ABET-approved courses in both engineering and technology.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by regional accreditation agencies like the Southern Association of Colleges and Schools.

"X" means none of the preceding codes apply.

R: Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in the survey of 1988 enrollment. Codes are listed here in alphabetical order; two codes were defined but not used.

"A" means all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for the specific population groups. The numbers for all enrolled students are not affected.

"B" is similar to "A," except that details were provided for women only; details for minorities and for foreign nationals were not provided.

"C" is similar to "A," except that details were provided for women and minorities only; details for foreign nationals were not provided. This code is not applicable for technology programs.

"D" and "E" are similar to "A," except that the mssing details were those for women or minority groups, respectively; neither of these codes was actually used for the 1989 survey.

"F" is similar to "E," except that details were provided for some, but not all, of the minority groups; that is, some minority data were missing.

"G" means that part-time enrollment was not separated out from full-time enrollment.

"H" is similar to "G": part-time enrollment was not separated out from full-time enrollment, and in addition, some details were missing.

"P" means that some data were developed by EMC, by pro-rating accurate aggregates (such as information on all female enrollment) among the various programs at a school.

"Q" means that some data were prorated by EMC, and in addition other data were missing altogether.

"8" denotes a substituted response using data originally submitted for Fall, 1988. Fifteen technology schools were treated with such data.

"7" denotes a substituted response using data originally submitted for Fall, 1987. Two technology schools were handled with this older data.

"5" denotes a substituted response using data originally submitted for Fall, 1985. This code was used only for one of the engineering schools in the 1989 survey; it was not needed for any schools of engineering technology.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR7: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1987 response. "TAR" code of NEB: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for minorities and foreign nationals.

Program-Level Accreditation Codes:

These are used only in the tabulations for specific curricula:

"B" denotes ABET accreditation for the program at the bachelor's level.

"M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent).

"A" denotes ABET accreditation at the associate degree level.

"N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when an ABET-approved BS curriculum in mechanical engineering is offered. If an undergraduate program in engineering mechanics as such existed, then a "B" code would have been used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

Engineering Discipline Category Abbreviations:

AER = Aerospace and Related
ACN = Air Conditioning/Refrigeration /Heating
ARC = Architectural
AUT = Automotive
CHE = Chemical
CVL = Civil
CMP = Computer
CON = Construction
DRF = Drafting and Design
ELC = Electrical
ELM = Electrictromechanical
ELX = Electronic
ENS = Engineering Science (NOT in the sense of Pre-Engineering)
GNL = General Engineering Technology
INM = Industrial/Manufacturing/ Engineering Management
MAR = Marine
MTL = Materials
MEC = Mechanical
MGN = Mining/Metallurgy/Welding
NUC = Nuclear
SYS = Systems
OTH = Others, including Biomedical, Agricultural, Ceramic, Environmental, and Petroleum

MISCELLANEOUS NOTES

First-year enrollments are incompletely covered in these surveys, for a variety of reasons, including the fact that at many schools freshmen cannot declare a major field. The under-enumeration is consistent from one year to the next, so EMC's freshman time series data are reliable as an indicator of trends, even though they fall considerably short of a total enumeration.

Women counted by EMC include minorities or foreign nationals. Counts of ethnic minorities are limited to U.S. citizens or other permanent residents. "Foreign Nationals" are students in the United States on F-1 (student) or J-1 (exchange) visas, and exclude immigrants or other permanent residents.

CURRENT AND FORTHCOMING ENGINEERING MANPOWER COMMISSION PUBLICATIONS

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1990 (to be distributed in July 1990)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1990 (to be distributed in July 1990)

An abridged version of the Special Industry Report. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1990 (to be distributed in July 1990)

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1989

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the nation. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

NEW! Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING AND TECHNOLOGY DEGREES, 1989

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

NEW! Machine-readable data files for Lotus 1-2-3: member price $595.00 non-member price $795.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $14.00

TO ORDER:

Machine-readable products are provided on IBM-standard 5 1/4" floppy disks and include most, not but all, of the details available in EMC's printed reports; for more information on these diskette products, contact the AAES Manpower Studies Department.

Member prices are available to members of AAES member societies, employees of Industry Affiliates, and educational institutions or firms that have participated in the study to be purchased. Please include society affiliation and membership number, Industry Affiliate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Institutional purchase orders are accepted, as are Visa and MasterCard charges (include account number, expiration date and signature). Orders charged to Visa and MasterCard accounts may be placed directly by phone (U.S. only) at 1-800-658-8897. Mail orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.
